Custom Made

We offer a service to provide a shelter to suit your individual requirements.

See overleaf for our shelter designs.

MORRICH

Our "Morrich" shelter gives adequate cover to your bicycles, whilst giving an attractive style to compliment your surrounding buildings

STRUIE

The "Struie" is a more conventional/traditional style shelter which provides optimum cover. Gates/Doors can also be added with ease to provide maximum security

TOASTRACKS

The Sheffield style Toastracks have the same dimensions & specification as the individual Sheffield stands, but supplied in modules for easy joining together on site to create a toastrack effect, with a steel section base. Stands are positioned 750mm apart and are for bolting down only. Galvanised finish standard. Other colours/finishes available. Made to order for any number of bikes

SHEFFIELD STANDS

Sheffield style bicycle stands are popular with users and Local Authorities in particular. These cycle stands can accommodate one or two bicycles (one each side). The user can lock the frame and wheels to the stand by their own chains, padlocks, cables or D-locks. Available ragged for casting in or flanged for bolting down. When positioned adjacent to one another stands should be around 800mm apart and around 450mm from any wall or other obstruction. Available as Galvanised, Powder coated (any colour) and in stainless steel finishes.

GARRICK

Our Garrick Shelter offers an attractive design as well as being a practical option. Available with PTE Clear view sheets or with box profile plastisol coated sheeting. Also available with gated front option for additional security. Galvanised steel or Powder coated (any colour)
